PROFESSIONAL SUMMARY

Computer Science student specializing in Cyber Security and Forensics, with hands-on experience building and deploying full-stack web applications end-to-end. Skilled in penetration testing, vulnerability assessment, and secure development practices, complemented by practical expertise in React, Next.js, Node.js, and cloud deployment. Proven track record in conducting research on AI-driven security threats, while independently shipping production-grade features across multiple live client projects.

WORK EXPERIENCE

DelPat LLP *Jun 2025 - Dec 2025*

Full Stack Developer Intern | Remote

- Engineered and deployed 6+ production web applications end-to-end across client and internal projects, covering full-stack architecture, deployment, and maintenance.
- Architected a role-based CMS backend with JWT authentication, image processing, and full CRUD APIs; led a full WordPress-to-React migration for a client site.
- Built a reusable component library adopted across multiple projects, cutting redundant development time and enforcing consistent design standards.
- Kickstarted a cross-platform React Native app from PRD and ER-diagram design through navigation and UI-library integration.
- Provisioned AWS EC2 cloud infrastructure and managed multi-environment deployments via Vercel and Firebase Hosting, independently resolving CI/build and backend-integration issues.

Research Publication - ICTBIG 2024 (IEEE Xplore) *Nov 2024 - Mar 2025*

Researcher | DOI: 10.1109/ICTBIG57409.2024.10911062

- Authored and published “Real-Time Detection of AI-Generated Deepfake Audio: A Novel Approach” in IEEE Xplore, contributing a peer-reviewed method to the AI-security research community.
- Researched and implemented a CNN-based signal-processing pipeline for real-time deepfake audio detection using spectral feature analysis.

EDUCATION

MIT World Peace University, Pune

B.Tech in Computer Science (Cyber Security and Forensics) | CGPA: 7.47/10 *2022 - 2026*

Hislop Junior College, Nagpur

HSC (MSBSHSE) | 70.67% *2022*

Jet Kids International School, Pusad

SSC (CBSE) | 87.6% *2020*

PROJECTS

Email Security Analyst - Phishing Detection Platform | Python, Flask, Scikit-learn

- Developed a Flask web application that analyzes email content and classifies phishing attempts using TF-IDF feature extraction and Logistic Regression.
- Implemented sender authentication checks (SPF, DKIM, DMARC), URL analysis, and attachment scanning to generate a composite threat score and security report.

CloudMigrate - Multi-Cloud Data Orchestration Platform | Next.js, Python, AWS S3, GCP, Supabase

- Built a Python-based pipeline to securely transfer files from AWS S3 to Google Cloud Storage.
- Implemented MD5 and SHA-256 hashing to verify file integrity and detect corruption during transfer.

ATMS - Enterprise Asset Management System | React, MongoDB, RBAC

- Developed a full-stack asset management system to track organizational assets across their lifecycle.
- Implemented Role-Based Access Control (RBAC) to provide secure, permission-based access by user role.

SKILLS

Languages: Python, SQL, JavaScript, TypeScript.
Web Development: React, Next.js, React Native, Node.js, Express.js, TailwindCSS, REST APIs.
Databases & Cloud: MongoDB, MySQL, Firebase, AWS (EC2, S3), Vercel, GCP.
Security & Compliance: Vulnerability Assessment, Risk Assessment, ISO 27001 (ISMS), ISO 9001 (QMS).
Security Tools: Wireshark, Nmap, Nessus, Burp Suite, Metasploit.
Practices: Technical Documentation, Agile Collaboration, CI/CD, Analytical Problem-Solving.

CERTIFICATIONS & ACHIEVEMENTS

- HackMIT 2025 (CTF) - 5th Rank: Secured 5th place by solving 15+ challenges in web security, reverse engineering, cryptography, and logical analysis.
- Blockchain Evolution Certification - GIAN Program on Decentralized Systems, NIT Goa (2025)
